WILDLIFE ENCOUNTERS L L C

Type: ROUTINE INSPECTION

Date: 08-FEB-2022

3.127(b) **Direct**

Facilities, outdoor.

4 sheep were kept outside in a snow covered pen and a small shelter which had standing water covering the floor where the animals were fed. Animals kept outside must have adequate shelter including dry space for feeding and resting. Inadequate shelter and lack of a dry area may contribute to stress, animal discomfort, inability to access uncontaminated feed, and an inability to appropriately thermoregulate. The licensee must ensure all animals in the enclosure have access to dry shelter.

Correct by end of day.

A complete routine inspection was conducted starting on February 8, 2022. This inspection report is limited to the Direct non-compliance identified during that inspection. An additional inspection report will be delivered with the other issues identified during this inspection.

This inspection was conducted with the facility representative. The exit briefing was conducted on February 8, 2022 with the facility representative.
