Type: RE-LICENSE INSPECTION

Date: 27-MAR-2024

---

### 3.127(d)

#### Facilities, outdoor.

There is a new 8ft perimeter fence on the east side of the facility, approximately 120ft long that has been placed, however the bottom of the fence is not secured at ground level in a way to prevent animals from gaining entry into the facility or prevent animals that escape their primary enclosures from leaving the facility under the fence line. There are multiple holes in the soil under the fence line (approx 8 in-10 in deep) that can be used as entry/exit points into the facility by any animal. The fence has not been finished at the bottom and requires additional maintenance to close up the holes and gaps between the fence and the ground in order to prevent entry and exit into the facility from under the fence.

A complete perimeter fence is required in order to protect the regulated animals from outside animals or people making contact with their primary enclosures, and to prevent any regulated animals that escape their primary enclosure a secondary containment area.

On or after May 17, 2000, all outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences less than 8 feet high for potentially dangerous animals, such as, but not limited to, large felines (e.g., lions, tigers, leopards, cougars, etc.), bears, wolves, rhinoceros, and elephants, or less than 6 feet high for other animals must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspection(s) or by May 26, 2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.
