

## Inspection Report

Joyce Cairns  
375 N 100th Rd  
Glasco, KS 67445

Customer ID: **4176**  
Certificate: **48-A-1027**  
Site: 001  
Joyce Cairns

Type: ROUTINE INSPECTION  
Date: 13-DEC-2017

### 2.40(b)(2) DIRECT REPEAT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*Female Dachshund ("Bella" DOB 4-23-07) with chip number OAO2350968 has a heavy coating of dental calculus covering both upper canines, the molar and premolar teeth, and partially coating all of the remaining incisor teeth. There is creamy discharge mixed with hair and debris along the gum line of the upper premolar teeth. The gum line is mildly recessed here and along the upper incisor teeth. There is one loose upper premolar tooth.

\*\*Female Dachshund ("Windy" DOB 11-2-06) with chip number 090 548 536 has excessively heavy dental calculus completely coating the upper canine teeth and remaining premolar and molar teeth. The excessive dental calculus on the upper 4th premolar teeth causes a visible bulge to the face when the dog's mouth is closed. There is creamy discharge and a recessed gum line over the left premolar teeth. There is one loose upper left premolar tooth. Dental disease can be painful as it can cause damage to the gum tissue, teeth, and the bone of the jaw supporting the teeth. Dental disease can also impact the ability of the dog to eat normally and affect the overall health of the animal.

\*\*Adult Pekingese ("Brooke" DOB 1-10-10) with chip number OAO2225075 has dull, uneven surface of the left eye (cornea) with green discharge collecting there and on the fur around the eye. The "white of the eye" on the top of the left eye is more red than the right eye. Eye problems can be a result of infection, trauma, and a variety of other medical problems and be painful.

The animal listed above must be examined by a licensed veterinarian in order to ensure that an accurate diagnosis is obtained and an appropriate treatment plan is developed and followed. This information, including the diagnosis, treatment and resolution of the condition, must be documented and made available to the inspector upon request.

### 3.6(a)(2)(ii)

#### PRIMARY ENCLOSURES.

Three enclosures in the whelping building have unprotected heat lamps positioned at a level that the adult dogs housed within could come into contact with the bulbs if they were to stand up on their hind legs. Exposed and

## Inspection Report

---

unprotected heat lamps can cause burns to the dogs if they come into contact with the bulbs. The licensee must ensure that all primary enclosures are constructed and maintained so that they protect the dogs from injury. To be corrected by 20 Dec 2017.

This inspection and exit interview were conducted with facility representatives.
