Customer ID: **12028**
Certificate: **23-C-0252**
Site: 001
SCOT MILLER

Type: ROUTINE INSPECTION
Date: 10-JUL-2017

3.6(c)(1)(iii)

PRIMARY ENCLOSURES.

*** The interior height of the enclosure housing two puppies is only three inches above their head in a standing position. The interior height of the enclosure must be at least 6 inches higher than the head of the tallest dog in the enclosure when it is in a normal standing position. These puppies need to be moved to an enclosure with enough height for their comfort.

Corrected by: July 11, 2017

3.8(b)

EXERCISE FOR DOGS.

*** Two puppies housed together are in an enclosure that measures 7.18 square feet. The dogs are 20 inches long and require 9.38 square feet of space to meet their exercise requirements. This needs to be addressed for the health and comfort of the dogs.

Correct by: July 11, 2017

3.80(a)(2)(ix)

PRIMARY ENCLOSURES.

*** The enclosure for the Capuchin has paint that is flaking off the ceiling and underneath the paint, rust is evident. The floors of the enclosure are no longer impervious to moisture and need to be resealed. The brackets connecting the igloo to the elevated shelf are also rusted and need to be addressed. Rusted areas prevent the enclosure from being readily cleaned and sanitized. This enclosure needs to be maintained in good repair to facilitate cleaning of the enclosure and for the safety of the animals.

Correct by: July 24, 2017

This inspection and exit interview were conducted with the licensee.
