Type: ROUTINE INSPECTION  
Date: 21-APR-2015

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*\*A female Maltese (#098\*333\*071) had fecal material and bedding debris matted in the fur under her tail and rear legs. According to the licensee, this condition was due to changing the food a couple of days ago. Matted fecal material can be uncomfortable and can increase the risk of skin sores. The licensee must ensure this dog's fur under the tail is cleaned and groomed from the matted fecal material. The licensee must establish an appropriate grooming schedule for all dogs. The licensee must ensure that all animals receive adequate veterinary care at all times. TO BE CORRECTED BY: April 22, 2015.

### 3.11(b)(2)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

\*\*\*There were at least 5 water receptacles, including stainless steel and rubber receptacles, which had an accumulation of a dark green algae-like growth on the inside surfaces. Water receptacles which are not properly cleaned or sanitized can harbor disease-causing organisms. The licensee must ensure that all water receptacles are sanitized at least once every 2 weeks and more often if necessary to prevent an accumulation of dirt, debris, food waste and other disease hazards.  
TO BE CORRECTED BY: April 28, 2015.

The inspection and exit interview were conducted with Dr. Erika Leisner (VMO), Bill Heine (ACI) and the licensee.

#### Additional Inspectors

Heine William, Animal Care Inspector
