

Inspection Report

STAR Eco Station
10101 Jefferson Blvd.
Culver City, CA 90232

Customer ID: **21372**
Certificate: **93-C-0702**
Site: 001
STAR Eco Station

Type: ROUTINE INSPECTION
Date: 29-MAY-2025

3.131(c)

Sanitation.

The following housekeeping issues were noted:

- In a transitional hallway there was a mild to moderate accumulation of dust and debris underneath and behind the supply storage racks.
- In the large multipurpose room, around the windowsill, there were at least 3 cobwebs approximately 3 inches in size. One wall had an approximately 1-foot X 1-foot section where the paint was peeling off. At least 2 ceiling tiles were beginning to separate from their support structure and there was an approximately 2-inch X 1-inch section missing from one ceiling tile.
- In the small multipurpose room, there was a mild to moderate accumulation of dust and debris in the corners and under the sink. Also, the stacked items on the ground next to the sink appeared to impede adequate cleaning in this area.

Failure to maintain premises as required may affect the health and well-being of the animals.

Premises (buildings and grounds) shall be kept clean and in good repair in order to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart. Accumulations of discarded items shall be placed in designated areas and cleared as necessary to protect the health of the animals.

To be corrected by August 15, 2025

This inspection and exit interview were conducted with the facility representatives.
