Type: ROUTINE INSPECTION
Date: 22-MAR-2016

3.131(a)

SANITATION.

- In an outdoor enclosure housing a single kinkajou the area around the entrance to the shelter is covered with greasy black debris. This appears to be residue from the animal's body which has become "ground into" the wooden shelter. This is a potential source of contamination and must be cleaned appropriately.

Correct by: 29 March 2016

Inspection and exit interview conducted by Michael Tygart (VMO) with facility representative.
