2.32(a) CRITICAL

PERSONNEL QUALIFICATIONS.

On 12/29/17 two male macaques received immediate veterinary care for injuries acquired when they comingled after they were able to open a divider between their enclosures. This occurred when a caretaker failed to properly secure the divider latch after a cage change out. The incident was immediately investigated and employees were promptly retrained on how to secure latches on all types of enclosures. A daily log which indicates enclosures are latched properly is now maintained in animal rooms. The research facility must ensure that all personnel involved in animal care are trained and qualified.

CORRECTED AT TIME OF INSPECTION

The inspection and exit briefing was conducted on 4/2/18 - 4/5/18 with facility veterinarians and employees.
