2.131(d)(2)

HANDLING OF ANIMALS.

*****There was not an identifiable attendant present at all times when the public is allowed access to the reindeer exhibit. The public was allowed in the area surrounding the enclosure that houses two reindeer. The enclosure fencing consisted of livestock panels with horizontal bars spaced approximately twelve inches apart. The public could stand next to the panels and reach inside the enclosure. The absence of an attendant endangers the health of the animals by allowing activity (rough handling, improper feeding, etc.) that is harmful to the animals. The licensee must ensure that when the public is present an easily identifiable attendant is present in these areas. The licensee corrected this non-compliance during the inspection.

To be corrected from this date forward.

An exit interview was conducted with a facility representative.

This inspection was conducted at a travel site in West Valley City, Utah.
