2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There were 3 adult sows in Farrowing enclosures with approximately 1-2 inch diameter abrasions on the their sides that been treated appropriately with topical antibiotic cream, but the treatments had not been recorded on the pen card. Additionally, another sow was mildly lame that had also not been recorded on the animals pen card. The facility uses the pen cards to communicate treatment with the attending veterinarian. All animals should be observed on a daily basis, with any problems conveyed to the attending veterinarian in a timely manner. Failure to consult with a veterinarian and provide appropriate diagnostics and treatment can result in a poor outcome for animals.
