Sugar Land, TX 77478

Customer ID: **1503**
Certificate: **74-R-0049**
Site: 001
STILLMEADOW, INC.

Type: ROUTINE INSPECTION
Date: 28-JUL-2016

2.33(a)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

*The dog and cat parasite control program as listed and outlined on the written program of veterinary care and the facility animal health program (SOP) states that deworming will occur twice yearly. Medical records document annual deworming and personnel confirm only yearly deworming is conducted for dogs and cats.

*The parasite control program included in the written program of veterinary care also requires annual fecal testing of a representative sampling of dogs and cats. Facility personnel indicated that this fecal testing is not being conducted.

To ensure adequate veterinary care and appropriate intestinal parasite control, including diagnosis, treatment and prevention, the facility should follow the program of veterinary care as directed by the attending veterinarian. Failure to follow the directed program could result in delayed diagnosis and complications from undetected and prolonged intestinal parasite infection in the animals.

Correct the above by: August 29, 2016.

2.33(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

An adult, male brown and black short haired cat identified with animal number 1934 was noted to have alopecia covering approximately 30 % of the top and sides of the torso. The visible skin was red, inflamed and appeared crusted in some areas. Facility personnel stated the hair loss had been identified in this animal but the condition of the skin had not. Medical records for this cat did not identify hair loss, a compromised skin condition or treatment for these abnormalities.

Skin conditions can cause discomfort to the animal and concurrent infection may be present. The registrant should establish and maintain programs of adequate veterinary care, including the use of appropriate methods to prevent, diagnose and control diseases and injuries. The facility must ensure that procedures are implemented for injured or

Inspection Report

sick animals to promptly receive appropriate veterinary treatment.

Correct by: The facility corrected this non-compliant item during the inspection by consulting with the attending veterinarian and administering appropriate treatment.

The inspection and exit interview were conducted with the vice president.
