Type: ROUTINE INSPECTION
Date: 20-JUL-2016

2.40(b)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The carbon dioxide tank used for the euthanasia of rabbits has a pressure reducing regulator, but there is currently no flow meter. The 2013 edition of the AVMA Guidelines for the Euthanasia of Animals states that an appropriate pressure reducing regulator and flow meter or equivalent with demonstrated capability for generating the recommended displacement rates for the size container being utilized is absolutely necessary for the humane application of CO₂. A flow meter needs to be added to the CO₂ tank and pressure reducing regulator to ensure the animals are appropriately euthanized following the AVMA Guidelines. Correct by August 10, 2016.

An exit briefing was conducted with owner.
