Type: FOCUSED INSPECTION

Date: 20-AUG-2024

2.40(b)(3)

Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

During the inspection in the sheep pasture, a white, female domestic sheep was observed to be severely limping on her front right leg. When encouraged to walk, the ewe would touch her right front toes to the ground but not bear weight on the leg. The facility representatives were unaware of the abnormal gait of the animal until pointed out by the inspector. The attending veterinarian had not been notified of the abnormal condition of the sheep and veterinary care has not been provided to evaluate the sheep's leg. Daily observation of all animals shall be made to assess their health and well-being and promptly identify injuries, disease, and other medical conditions. Untreated injuries, infections, and other conditions can be painful and cause suffering to the animal. The female sheep must be evaluated by a veterinarian and any prescribed treatments and care must be followed.

***To be corrected by: 5:00pm CST on 8/21/24 or prior to the next licensing inspection, whichever comes first.

This inspection and exit interview were conducted with the facility representatives.
