PROJECT SURVIVALS CAT  
HAVEN

Type: ROUTINE INSPECTION

Date: 13-DEC-2023

---

### 3.137

#### Primary enclosures used to transport live animals.

In October of 2023, the facility transported an approximately 6 week old mountain lion cross-country in a vehicle, the animal was outside of a primary enclosure for portions of the trip. In video documentation, facility staff can be seen holding the animal in their laps and placing the animal on the floor of the moving vehicle with no other form of restraint or control. Although, the animal was noted to be in good condition, healthy, and receiving proper care during inspection, transporting animals without the use of a primary enclosure puts them at risk of injury in the event of an accident. When in transit, it is necessary to ensure regulated animals are housed in enclosures meeting transportation regulatory requirements for that species.

Correct by 12/22/23

This inspection and exit interview were conducted with a facility representative.
