NOAHS ANIMAL ADVENTURES INC

Type: ROUTINE INSPECTION
Date: 03-NOV-2016

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Section 2.40(b)(2) Veterinary care: The white llama has overgrown hooves on both the front and back feet. The ends of the hooves are curved, causing the toes of the feet to be spread apart when the animal stands. Long hooves may cause problems such as hoof rot and lameness. Each exhibitor must establish and maintain an adequate program of veterinary care that includes the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries. Correct by having the hooves on the white llama trimmed. Correct by November 10, 2016.

This inspection and exit interview were conducted with the facility owner.
