

Inspection Report

Underwood Family Farms L.P.
P.O. Box 596
Somis, CA 93066

Customer ID: **330310**
Certificate: **93-C-1078**
Site: 001

Underwood Family Farms L.P.

Type: ROUTINE INSPECTION
Date: 17-APR-2017

2.40(b)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

There were several medications that did not have the complete labeling. They were missing the veterinarian's name, the date of expiration, and the animal for which it was prescribed.

Such information is necessary, for example, to ensure the correct animal is receiving the medication and to be able to contact the prescribing veterinarian for any follow-up that might be needed.

The facility corrected by June 3, 2017.

3.125(a) REPEAT

FACILITIES, GENERAL.

In the goat enclosure at the Moorpark facility, there are two areas of the sheet roof that had exposed sharp edges. The sharp edges are located at a level where the animals could injure themselves when climbing on the roof.

There was also rusting, irregular, and exposed sharp edges on the door of the truck that was used as a climbing structure. The sharp edges are located at a level where the animals could injure themselves when climbing.

Animal housing facilities shall be maintained in good repair to protect the animals from injury. A system of facility monitoring and maintenance is necessary for optimal health and well-being of the animal.

The facility corrected by June 3, 2017.

3.127(a)

FACILITIES, OUTDOOR.

Although there were some structures to provide shade, immature goats housed in an outdoor facility would not have adequate shade to protect them depending on the time of day. Therefore, these animals would be exposed to direct sunlight.

Inspection Report

Having inadequate shade and being exposed to sun for long periods of time can lead to discomfort and overheating of the animal. Young animals have a harder time cooling and maintaining body temperature.

Adequate shade must be provided for all animals.

The facility corrected by June 3, 2017

This inspection and exit briefing were conducted with a facility representative.
