Type: ROUTINE INSPECTION
Date: 17-SEP-2015

2.40(b)(2) DIRECT REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A fawn and white adult male French Bulldog (microchip number 105 352 115) has excessively long toe nails on both front and rear feet. Most of the toe nails are curving backwards toward the foot pad. The inner toenail on the left front foot has grown into a footpad. Long toe nails can be painful causing discomfort when the dog is trying to walk. Lack of nail care on a regular basis can affect the health and well-being of dogs. The licensee must have the toenails of this dog trimmed by close of business tomorrow, 9-18-2015 and must still establish a nail trim maintenance program for all dogs at the facility.

2.75(a)(1) REPEAT

RECORDS: DEALERS AND EXHIBITORS.

There are three litters of puppies totaling 17 puppies that do not have inventory information recorded for them. Also there are 35 adult dogs in the kennel and the licensee has 24 recorded on the Dogs on Hand forms. Complete and accurate records are needed to ensure that every puppy and adult dog identity can be known with certainty and to facilitate the ability to trace all puppies and adults. The licensee must maintain complete and accurate records of all puppies and adults at all times at their facility.

3.1(c)(1)

HOUSING FACILITIES, GENERAL.

There is an area on the inside wall where an approximate 2"X3" area of the wall material is missing exposing a crack and unsealed wood beneath. This area cannot be readily cleaned and sanitized and can lead to disease transmission. All surfaces in contact with the dogs need to be constructed and maintained in a manner that allows them to be readily cleaned and sanitized. Correct by 17 Oct. 2015.

This routine inspection and exit interview were conducted with a facility representative.
