Facilities, general.

An approximately 2'x3' area of exposed chain link wire on the floor of one corner of the enclosure housing 3 African crested porcupines is observed. Exposed chain link in the floor of an enclosure housing animals that are heavy diggers poses a foot entrapment risk. The regulations state that the indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals. Correct by 23May2024.

This inspection and exit interview were conducted with facility representatives.
