### 3.125(a)

#### FACILITIES, GENERAL.

The perimeter camel pen has one camel. The north fence has the ground washed out for about 80-100 feet. The gap from the bottom of the fence to the ground is about 4-6 inches. For the health and wellbeing of the animal, the fence needs to meet the ground. The facility is to create a monitoring system to insure that the all outdoor housing facilities are structurally sound and maintained in good repair to protect the animals from injury and to contain the animals.

To be corrected by July 1, 2016

An exit briefing was conducted with the facility representative
