Environment enhancement to promote psychological well-being.

The facility does not have a developed and documented environmental enhancement plan for the birds at the facility. Failure to develop and document an environmental enhancement program for birds can negatively impact their health and well-being, causing unnecessary psychological distress. Correct by developing, documenting, and following a species-appropriate plan for environmental enhancement that is adequate to promote the psychological well-being of the birds. The plan must be approved by the attending veterinarian and must be in accordance with the regulations in subpart G and with currently accepted professional standards as cited in appropriate professional journals and reference guides. This plan must be made available to APHIS upon request. The plan must address each category listed in 3.154. Correct by November 3, 2023.

This inspection and exit interview were conducted with facility representatives.
