

Inspection Report

Delta Air Lines Inc
1010 Delta Boulevard
Atg 109 - Oc1, 4th Floor
Atlanta, GA 30354

Customer ID: 828
Certificate: 57-T-0001
Site: PHL
DELTA AIRLINES INC

Type: ROUTINE INSPECTION
Date: 01-OCT-2019

3.36(a)(6)

PRIMARY ENCLOSURES USED TO TRANSPORT LIVE GUINEA PIGS AND HAMSTERS.

Transport enclosures housing hamsters and guinea pigs did have adequate rims or other devices on the exterior of the outside walls to provide a minimum air circulation space of .75 inches. The lid of the transport enclosures only provided .25 inches of ventilation space on the sides. Transport enclosures for hamsters and guinea pigs must have projecting rims or other devices on the exterior of the outside walls which provide a minimum air circulation space of .75 inches between the transport enclosure and any adjacent cargo wall.

Failure to provide a circulation space of at least .75 inches on the sides of transport enclosures could put animals at risk of overheating or having reduced air circulation. Carriers and intermediate handlers must not transport animals unless there are adequate projecting rims or other devices that provide at least .75 inches of air circulation on the exterior of the outside walls of the animal transport container (see air waybill # 006 LAX 78985222).

3.137(a)(5)

PRIMARY ENCLOSURES USED TO TRANSPORT LIVE ANIMALS.

Transport enclosures housing chinchillas did have adequate rims or other devices on the exterior of the outside walls to provide a minimum air circulation space of .75 inches. The lid of the transport enclosures only provided .25 inches of ventilation space on the sides. Transport enclosures for chinchillas must have projecting rims or other devices on the exterior of the outside walls which provide a minimum air circulation space of .75 inches between the transport enclosure and any adjacent cargo wall.

Failure to provide a circulation space of at least .75 inches on the sides of transport enclosures could put animals at risk of overheating or having reduced air circulation. Carriers and intermediate handlers must not transport animals unless there are adequate projecting rims or other devices that provide at least .75 inches of air circulation on the exterior of the outside walls of the animal transport container (see air waybill # 006 LAX 78985222).

This inspection and exit interview were conducted with the supervisor.
