Type: ROUTINE INSPECTION
Date: 30-NOV-2021

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There were several expired medications in the kennel building stored in the same place as medications in use.

Oxytocin injectable expired Aug 2018

LRS injectable fluid expired Dec 2020

Hypertonic Saline injectable fluid expired Aug 2020

Using expired drugs is not an appropriate method to prevent or treat injury or illness. The efficacy of these products beyond their expiration date is uncertain. Use of these drugs could lead to failure to prevent or treat illness causing animal harm and suffering.

NOTE: Expired medications were discarded during the inspection.

TO BE CORRECTED BY: 1 December 2021

3.13(b)

Veterinary care for dogs.

The Program of Veterinary Care does not address the sampling of dogs for heartworm, coccidia or giardia. A preventative dewormer treatment is listed for intestinal parasites but does not address a schedule to sample for giardia and coccidia.

Sampling for parasites is important to know with certainty that the preventative program is adequate to prevent infestation.
