

## Inspection Report

University Of Colorado-Boulder  
2860 Wilderness Place, 603 Ucb / Room 122  
Boulder, CO 80301

Customer ID: 1835  
Certificate: 84-R-0060  
Site: 003  
RALFIES

Type: ROUTINE INSPECTION  
Date: 08-JUN-2016

### 3.127(c)

#### FACILITIES, OUTDOOR.

The shelter dirt floor had accumulation of water and mud due to run off water. This is the only area where Ralphie 4 can get away from inclement weather.

In order to prevent foot issues (foot rot) in animals exposed to muddy wet soil, a suitable method shall be provided to rapidly eliminate excess water.

To be corrected by 6-30-2016.

### 3.130

#### WATERING.

The water receptacles for both Bison had accumulation of algae and sediments. Due to Higher temperatures during the summer algae develops faster and receptacles need to be cleaned more often.

In order to prevent gastrointestinal issues, all receptacles need to be kept clean and sanitary.

To be corrected by 6 15-2016.

An exit interview was conducted with the facility representative.
