PRIMARY ENCLOSURES.

Two enclosures did not meet the minimum required floor space. The first enclosure housed six weaned Bichon frise/Shih tzu mix puppies (born 10/2/2015) averaging 12 inches in length. The enclosure was 24 inch by 48 inch. The puppies required a minimum of 13.5 square feet and were provided 8 square feet of space. The second enclosure housed four weaned black schnauzer puppies (born 9/30/2015) averaging 14 inches in length. The enclosure was 24 inches by 48 inches. The puppies required a minimum of 11.1 square feet of space and they were provided 8 square feet of space.

Lack of adequate floor space can inhibit normal growth, movement, and overall well-being of the animals. The licensee must provide in a compatibly housed group a minimum space of 100% of required space for each of the animals housed together.
