Fresno's Chaffees Zoo Corporation
894 W. Belmont Ave.
Fresno, CA 93728

Customer ID: 35137

Certificate: 93-C-0752

Site: 001

Fresno's Chaffee Zoo Corporation

Type: RE-LICENSE INSPECTION

Date: 20-DEC-2023

2.131(b)(1) Critical

Handling of animals.

During the recapture process of a wallaroo that escaped a walk-through exhibit, while facility staff attempted to carry out recapture methods in a timely manner according to their standard operating procedures, unfortunately, the animal was severely injured when it repeatedly jumped headfirst into fencing. The animal received immediate on-site veterinary care and has received appropriate continued treatment for its injuries. Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort.

3.81

Environment enhancement to promote psychological well-being.

Although the facility does have an extensive enrichment program that provides appropriate enrichment for all of their species, the enrichment plan as written does not meet the regulatory requirements of the environmental enhancement plan to promote psychological well-being of nonhuman primates as required. The plan is necessary to ensure the psychological health and well-being of the animals housed within the facility. The facility must develop, document and follow an appropriate plan for environment enhancement adequate to promote the psychological well-being of nonhuman primates. The plan at a minimum must address social grouping, environmental enrichment, special considerations, restraint devices, and exemptions to the plan.

3.127(d)

Facilities, outdoor.

3.127 (d)Perimeter fence

In several areas of the perimeter fence, there were gaps, trees, brush and other objects that render the fence ineffective. Several gates were noted with gaps in excess of 4 inches around the sides and/or bottom of the gate, that could allow potential ingress of unwanted animals. There were several trees and shrubs adjacent to the outside and inside of perimeter fence that were overgrown and/or overhanging, decreasing the effective height. On the inside of a portion of the perimeter fence, there were large rocks and a large log adjacent to the fence that also reduce the effective height. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through or under it and having contact with the animals of the facility and so that it can function as a secondary containment system for the animals in the facility.

Inspection Report

3.154

Environment enhancement to promote psychological well-being.

Although the facility does have an extensive enrichment program that provides appropriate enrichment for all of their species, the enrichment plan as written does not meet the regulatory requirements of the environmental enhancement plan to promote psychological well-being of birds as required. The plan is necessary to ensure the psychological health and well-being of the birds. The facility must develop, document and follow a species appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian, and at a minimum must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by February 19th 2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
