### 3.153(c)

#### Primary enclosures.

8 ducks were in an enclosure that did not include water for bathing or other aquatic activities. Aquatic birds require access to water to perform natural behaviors, and may become debilitated and stressed without the ability to perform those behaviors. The facility must ensure that water adequate to meet the needs to perform natural behaviors is provided in the primary enclosure.

Correct by 28 November 2024

This inspection and exit interview were conducted with the facility representative.
