SMOKIES L L C

Type: ROUTINE INSPECTION

Date: 11-JUN-2021

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There are three goats that are very obese. Obesity can lead to severe health problems. There is no indication that the condition of these goats has been observed or communicated to the attending veterinarian. It is important that information on animal health conditions be provided to the attending veterinarian in a timely manner to allow appropriate course of action. The condition of the goats shall be communicated to the attending veterinarian for review and guidance on prevention to protect the health of the goats. Correct by June 18, 2021.

3.125(c)

Facilities, general.

There is trash accumulating in the food storage room around the feed being stored. The shelves directly above the feed are cluttered with equipment old bags, trash and various items. There is gas powered equipment in close proximity to the feed. The clutter on the shelves and floor may attract rodents and other vermin increasing the risk of food contamination. The room shall be cleaned and organized in a manner that will protect the feed from possible accidental contamination. Correct by Jun 19, 2021.

Inspection Report

The main enclosure and barn for the goats on the lower level have an excessive accumulation of excreta. There is several days accumulation of excreta inside the barn and on the main enclosure ground in front of the barn. Excreta shall be removed at a frequency that will protect the goats from contamination, minimize disease hazards and reduce odors.

Correct by June 19, 2021.

3.131(c)

Sanitation.

The storage cabinet for the medical supplies contains expired medications (Fungicide exp. 2014, Eprinex exp 5/2020), as well as WD-40. The cabinet shall be sorted and cleaned and expired items properly disposed of to prevent accidental use on the goat which may cause harm. Correct by June 19, 2021.
