SANDRA BAGBY

Type: ROUTINE INSPECTION
Date: 11-SEP-2014

3.56(a)(2)

SANITATION.

The litter in the rabbit enclosures needs to be removed and replaced with clean litter. The current litter is wet in one enclosure and contains a large amount of excreta in all the enclosures. Dirty litter can attract pests, cause odors and lead to discomfort and soiling of the animals. In enclosures with solid floors, soiled litter shall be removed and replaced with clean litter at least once a week. Correct by Sept. 13, 2014.

3.125(a)

FACILITIES, GENERAL.

Corral panels used to cordon off supply storage areas in the animal housing facility have been removed for another use. The goats and pigs have free access to these supply storage areas. Supplies noted include potential hazards to the animals such as stacks of wood and other equipment that may fall or entrap animals and bottles of chemicals including antifreeze and cleaning sprays (Chlorox) that are toxic to animals. The housing facilities must be maintained in good repair to protect the animals from injury. Correct by Sept. 18, 2014.

Exit conducted with undersigned facility representative.
