Certificate: **86-A-0084**

Site: 001

JAMES J DOUGHERTY, DONA M DOUGHERTY

Type: ROUTINE INSPECTION

Date: 21-MAY-2018

3.125(a)

FACILITIES, GENERAL.

***Two enclosures housing two servals each had light fixtures with exposed light bulbs that were not covered. The exposed light bulbs poses a risk of injury to the animals if it breaks and glass gets into the enclosures of these animals. A system of facility monitoring and maintenance should be in place to ensure all animal facilities are structurally sound and in good repair to protect the animals from injury.

Date to be Corrected: May 28, 2018

***An enclosure where four servals routinely play had wood climbing structures that were in disrepair. The edges of the wood climbing structures had jagged, splintered edges and there was an exposed nail that was protruding out of the wood where the animals could come into contact with it. All enclosures must be kept in good repair and free of sharp points and jagged sharp edges in order to protect the animals from injury.

Date to be Corrected: May 23, 2018 (the exposed nail in the wood climbing structure), June 18, 2018 (repair/replacement of the wood climbing structures).

This inspection and exit interview were conducted with the facility representative.
