Certificate: 43-A-2656
Site: 001
WILMA JINSON

Type: ROUTINE INSPECTION
Date: 26-AUG-2015

2.50(a)(1) REPEAT

TIME AND METHOD OF IDENTIFICATION.

There were four puppies that were 22 weeks of age that did not have official identification. Proper identification of each animal is needed for record keeping and animal traceability. The licensee shall ensure each animal at the facility is officially identified.

3.10 REPEAT

WATERING.

There were 4 mixed breed puppies with no official ID that did not have access to water. The same puppies were identified during the previous inspection because they had no access to water. When inspectors requested the caretaker supply the puppies with water the puppies demonstrated their thirst by drinking continuously for an extended length of time. It is crucial to the health and well-being of the animals that they are offered sufficient access to clean, potable water especially during hot summer conditions so that they do not become over heated or dehydrated. The licensee shall ensure that if potable water is not continually available to the dogs it is offered as often as necessary to ensure their health and well-being.

THE LICENSEE WAS AGAIN INSTRUCTED TO CORRECT THE ISSUE IMMEDIATELY BY PROVIDEING THE ANIMALS WATER.

This inspection and exit briefing was conducted with the licensee and VMO, Konnie Plumlee.

All 6 of the dogs identified during the previous inspection for veterinary care issues had received treatment and their condition was improving.
