Julies Jungle Inc
4235 Dewey Rose Lane
Cantonment, FL 32533

Customer ID: **1903**
Certificate: **58-B-0583**
Site: 001
JULIES JUNGLE INC

Type: ROUTINE INSPECTION
Date: 13-APR-2017

3.125(a) REPEAT

FACILITIES, GENERAL.

** In the first serval pen that contained an adult serval and two kittens there was the roof on the den that was sinking in the center. The roof had warped making the edges bend upward. Also the catwalk was leaning and partially falling over with a ramp attached to it. The ramp had stepping posts that were broken and were hanging side ways. At the top of one of the door ways there was a piece of wood that was partially falling off exposing the pointy ends of the wire paneling.

** In the fourth pen there were two servals. In this enclosure there was a catwalk that was warped where the ends of the wood curled upward. One board had a nail that had come out of it exposing the head. There was also mesh that was lining the walls of the enclosure that was coming down in which a cat could become entangled.

** In the fifth enclosure containing 2 servals there was mesh lining the fencing that was falling down or coming away from the fencing allowing potential for a cat to become entangled.

** In the first kinkajou enclosure containing one kinkajou there were two areas of the caging that the wiring had come undone and its pointy ends were exposed. These areas need to be repaired and secured to ensure the safety and containment of the animals.

** In the fennec foxes enclosure on the right there were small pieces of cut out chicken wire that were scattered on the ground. Also on the outside there was a beam of wood for the structure and a perch made of wood that had degraded and needs to be replaced.

** In the fennec foxes outdoor enclosure on the left there is a wood beam that is falling on the mesh covering of the enclosure that needs to be removed and repaired. This beam could possibly fall in and injure an animal or possibly create a means to escape.

** In the kinkajous enclosure on the left there is a den box made of wood that has been chewed and soiled. The box is in disrepair and needs to be repaired or replaced.

Inspection Report

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

3.131(a) REPEAT

SANITATION.

** In the first kinkajou enclosure that contained 1 kinkajou and the indoor and outdoor enclosure that contained 2 kinkajous there was an abundance of feces on the floor and on the playground toys. There was a foul odor and the presence of several flying insects.

** In three serval enclosures there was an abundance of feces and a foul odor. There were also some enclosure that contained soiled cardboard. The feces and soiled materials should be removed to minimize odors and pest.

Feces shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors. When enclosures are cleaned by hosing or flushing, adequate measures shall be taken to protect the animals confined in such enclosures from being directly sprayed with the stream of water or wetted involuntarily.

This inspection and exit interview were conducted with licensee.
