### 3.125(a)

#### Facilities, general.

The sides and entrance of the painted wooden shelter box occupied by one woodchuck has areas that are chewed creating a rough wood surface. Chewing on wood is a natural behavior of woodchucks but chewing a painted surface may result in injury to the animal. The shelter must be repaired and maintained to prevent injuries to the animal.

CORRECT BY : 11/19/2020

This inspection and exit interview were conducted with an animal husbandry staff member.
