

## Inspection Report

Thomas D Morris Inc  
4001 Millender Mill Road  
Reisterstown, MD 21136

Customer ID: 745  
Certificate: 51-B-0009  
Site: 001  
THOMAS D. MORRIS INC

Type: ROUTINE INSPECTION  
Date: 03-NOV-2015

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

- 1) The shelter for the Alan Front 7 pasture (housing 14 sheep) has the plywood rotted/worn away on the lower right front inside wall leaving sharp, jagged edges to the wood panel. There was a board that had broken off to a sharp point loosely attached to the bottom of the back wall. Animals lay against the walls of the shelter and may be injured by the jagged wood. The lightning rod for the shelter is detached from the roof and is hanging down by the left side of the shelter entrance. The cable for the lightning rod is also detaching from the upper front outside left wall of the shelter and there are nails dangling from the cable. Animals may be injured if the nails or lightning rod fall to the ground. The outside metal surface of the shelter has rusted sharp edges that may injure the animals if they rub or lay against the sharp metal edges. There were hoof tracks and bare ground indicating the sheep spent time in the shade behind the shelter where there were sharp metal edges.
- 2) The shelter for the Left Horse Paddock 5 pasture (housing 16 sheep) has the wood rotted/worn away on the lower back inside wall leaving sharp, jagged edges to the wood panels. Animals lay against the walls of the shelter and may be injured by the jagged wood.
- 3) The outside metal surface of the shelter for the Patterson 's Field 3 pasture (housing 41 goats) has rusted sharp edges that may injure the animals if they rub or lay against the sharp metal edges. The rain gutter on the back of the shelter is no longer securely attached and must be repaired to prevent it falling and providing a source of injury to the animals.

These animal shelters must be repaired to prevent injury to the animals. The facility must establish and maintain a program to keep the animal enclosures, including shelters, structurally sound and in good repair. This is a repeat citation under this paragraph that remains uncorrected.

The inspection was conducted 3 November to 5 November 2015. An exit interview was conducted with facility Vice President; David Oelberg, VMO; and Mary Geib, VMO.

#### Additional Inspectors

Geib Mary, Veterinary Medical Officer

Prepared By: DAVID OELBERG, D V M USDA, APHIS, Animal Care

Date:  
05-NOV-2015

Title: VETERINARY MEDICAL OFFICER 1043

Received by Title: VICE PRESIDENT
