VERNON MILLER
6255 NORTH 1000 WEST
SHIPSHEWANA, IN 46565

Customer ID: **323233**
Certificate: **32-C-0224**
Site: 001
VERNON D MILLER

Type: ROUTINE INSPECTION
Date: 20-SEP-2022

3.55

Watering.

The water bowl for two rabbits was green with algae. Algae can make water unpalatable and can reduce the rabbits intake. Water bowls should be thoroughly cleaned to prevent algae and to provide clean safe drinkable water. Lean the water bowl and provide fresh clean water for the rabbits by the close of business September 20, 2022.

3.78(e)

Outdoor housing facilities.

There is a hole in the chicken wire covering the framework of the pen housing two spider monkeys. The hole is large enough to allow the primates to reach out through the wall panel and reach the public barrier allowing possible contact. The barrier must be maintained to prevent any possible contact between the public and the primates. Fix the hole in the pen by close of business on September 22, 2022.

3.125(a)

Facilities, general.

The rear right hand corner of the pen housing the caviae has bent wire. The fencing is pulled up and there is a gap in the fence at the bottom. All pens must be maintained in good condition to prevent injury or escape. The fence must be fixed or replaced by close of business September 30, 2022.

This inspection and exit interview were conducted with licensee.
