Type: ROUTINE INSPECTION
Date: 09-JUL-2015

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

* One plastic bottle containing flagyl pills had no expiration date recorded on the label. This medication was intermingled with other products that are currently being used at the facility and are therefore ready for use. This medication was obtained from the attending veterinarian. The effectiveness of the dosage level and expected results could be drastically changed or may not work as anticipated if the expiration date is unknown. The licensee must ensure that all medications used in the facility are labeled with an expiration date.

* There was one five ml container of Neomycin and Dexamethasone Ophthalmic Suspension that had an expiration date of 05/2011. This medication was intermingled with other products that are currently being used at the facility and are therefore ready for use. The effectiveness of the dosage level and expected results could be drastically changed or may not work as anticipated if the medication is administered past the recorded expiration date. In addition, the usage of expired medications on regulated animals is not considered to be an acceptable veterinary practice. The licensee must ensure that all medications used at the facility have not gone past the recorded expiration date.

2.75(a)(1)

RECORDS: DEALERS AND EXHIBITORS.

* No inventory information was available on three unweaned kittens. Inventory information is needed to ensure the individual identity can be known with certainty and to facilitate the ability to trace all kittens. The licensee must make, keep and maintain complete and accurate inventory records that fully and correctly disclose information on all animals at the facility. Correct by 7/23/15.

* The facility inspection done on 7/9/15 and exit briefing done on 7/13/15 were conducted with the facility representative and Robert Bacon ACI.
