Site: 001
ACKS EXOTIC PETS

Type: ROUTINE INSPECTION
Date: 01-NOV-2018

3.126(b)

FACILITIES, INDOOR.

*** Currently the tenrecs are being housed in a room with high heat and humidity suitable for reptiles and amphibians. There is no ventilation in the room when the door is kept closed. Tenrecs have a preference for dry and cooler climates particularly when going into torpor. Indoor housing facilities shall be adequately ventilated to provide for the health and to prevent discomfort of the animals at all times.

Correct by: Nov 5. 2018

3.131(a) REPEAT

SANITATION.

*** The sugar glider enclosures in the back room need to be cleaned. There is accumulation of food debris and grime along the frame of the enclosures, along the wire sides and the exercise wheels. The buildup is an attractant for fruit flies and other pests. Cleaning of enclosures shall be done as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and eliminate odors.

Correct by: Nov 5, 2018

This inspection and exit interview were conducted with a facility representative
