Type: ROUTINE INSPECTION
Date: 01-NOV-2023

2.75(b)(1)

Records: Dealers and exhibitors.

Records were incomplete for some recently acquired animals: 3 dwarf hamsters, 4 juvenile coatis, and a few sugar gliders that had been born on the property.

It is important to keep complete records for animals acquired (purchased or donated) so that animals can be located if there is a disease outbreak, or if there are questions about animal sales.

Correct going forwards for all future animals acquired (bought or donated) by documenting the following information for each animal:

- 1) The name and address of the seller (or donor) and their USDA license number (if they do not have a USDA license, the record should show their driver's license number and vehicle tag number and state).
- 2) The date that the animal was purchased (or if born on site, the date of birth).
- 3) The species of the animal.
- 4) The number of animals in the shipment.

When animals are sold, records must show the name and address of the buyer, the date, and the species of animals, and the number of animals.

CORRECT BY: November 2, 2023.

This inspection and exit interview were conducted with the owner.
