

## Inspection Report

Real Pets Corp  
30 N 3rd St  
Womelsdorf, PA 19567

Customer ID: **24564**  
Certificate: **23-B-0200**  
Site: 004  
REAL PETS CORP

Type: ROUTINE INSPECTION  
Date: 20-OCT-2015

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Section 2.40(a)(1) Veterinary care: The written Program of Veterinary Care (PVC) for this facility lacks specific guidance for the care of animals. There is no specific guidance for the parasite control and treatment of conditions for the various species, only a list of drugs. Species specific dosing and route is not included for the drugs included in the PVC. Specific guidance from the attending veterinarian is required for all drugs used by the licensee. There is no specific guidance in the PVC for the method of euthanasia to be used by the facility, including its use, equipment, and the personnel trained and authorized to perform the euthanasia for the various species. Specific guidance and training in the procedure for euthanasia by the attending veterinarian is required to ensure animals are humanely euthanized according to the latest AVMA Guidelines for the Euthanasia of Animals (2013 edition).

Additional specific guidance is required for the Program of Veterinary Care. Failure to have specific accurate guidance does not ensure the attending veterinarian is aware of the current practices at the facility and also does not ensure the facility has accurate guidance to provide adequate veterinary care to the animals. Correct this by developing and implementing a complete, accurate Program of Veterinary Care for all species housed at the facility. Correct by November 20, 2015.

### 3.31(a)(3) REPEAT

#### SANITATION.

Section 3.31(a)(3) Cleaning and sanitation of primary enclosures: There were fifteen previously used guinea pig enclosures with fresh bedding and hay ready to house new guinea pigs arriving at the facility. There was a buildup of a white to brown roughened scale and debris in the corners, on the sides and around the bottom of the enclosures. The cleaning process utilized does not seem effective in removing this buildup. Housing guinea pigs in dirty and used enclosures exposes the animals to potential disease hazards such as bacterial, fungal, and viral diseases. The licensee must ensure that enclosures will be cleaned and sanitized prior to the introduction of guinea pigs into previously occupied enclosures. This is a repeat non-compliance that was cited earlier this year.

An exit briefing was conducted with the facility president; Mary Geib, VMO; and Robert Markmann, ACI.
