Coastal Farms and Exotics  
8575 Evans Road  
Chunchula, AL 36521

Customer ID: **506485**  
Certificate: **64-B-0098**  
Site: 001  
Coastal Exotics

Type: RE-LICENSE INSPECTION  
Date: 16-FEB-2023

---

### 3.78(d)

#### Outdoor housing facilities.

There were three access gates on the perimeter fence that were of insufficient height for non-human primates. The lack of an adequate perimeter fence presents a safety risk to the non-human primates within the facility in that there isn't an adequate secondary containment system to hold animals that may escape their primary enclosures or a sufficient barrier to keep animals and unauthorized persons out. The perimeter fence must be constructed to prevent unauthorized humans and other animals the size of dogs, skunks, and raccoons from going through or under it. The facility shall ensure the primary enclosures for the non-human primates, are enclosed by an appropriate perimeter fence, or a variance, if appropriate, needs to be obtained and can be requested from the Administrator. CORRECT BY: FEBRUARY 24, 2023

### 3.80(a)(2)(ii)

#### Primary enclosures.

The outdoor enclosure housing four ring-tailed lemurs has a heating lamp affixed to the outside of a barrel with a partially protected electrical cord extending from inside the primary enclosure to the outside of the primary closure. The outdoor enclosure housing two ring-tailed lemurs has a heating lamp affixed to the inside of a barrel with a partially protected electrical extending from the inside of the primary enclosure to the outside of the primary enclosure. The unprotected portions of the electrical cords were within reach of the animals. Electrical cords pose a significant health risk to animals

## Inspection Report

---

that may chew or pull on them. Unprotected powered electrical cords that are within an animal's reach allows access to an electrical hazard that can cause electrocution, injury, and/or death. The primary enclosure must be constructed and maintained so that it protects non-human primate from injury including limiting access to electrical cords. CORRECT BY: FEBRUARY 24, 2023

### 3.125(c)

#### Facilities, general.

Numerous ants were observed crawling in and out of the receptacle used to store the feed for the Patagonian caviars. The feed could not be scooped without picking up ants. The presence of vermin in the food storage receptacle can contaminate the feed which can cause potential disease hazards for the animals. Supplies of bedding and food shall be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination by vermin. The facility must store animal feed in such a way to protect against insect infestation. CORRECT BY: FEBRUARY 18, 2023

This is a 2nd Re-License Inspection for a Class "B" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 1 more inspection or by February 24, 2023, or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
