THE WYMAN LIVING HISTORY
RANCH & MUSEUM

Type: ROUTINE INSPECTION

Date: 14-SEP-2022

3.125(a)

Facilities, general.

In an enclosure for one elk, there is a broken metal gate between two pasture areas. The broken gate has multiple bars with sharp, rusted edges that are sticking into the opening. Parts of the broken gate are also laying on the ground. The inspector witnessed the elk walking over this debris and passing through the opening while maneuvering around the broken bars still attached to the fence. Additionally, there are multiple sharp wire points from the fencing that are sticking into the enclosure.

Sharp points and debris on the ground can cause injury to the animals. All enclosures shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

To be corrected by October 7, 2022.

3.130

Watering.

In an enclosure for one elk, the only water receptacle available contains dark green water and plant debris. The sides and bottom of the receptacle cannot be seen through the discolored water.

Failure to maintain a clean water receptacle can lead to water that becomes contaminated and an animal that is reluctant
