Certificate: **21-C-0406**  
Site: 001  
JORDAN PATCH

Type: ROUTINE INSPECTION  
Date: 29-JUL-2015

### 3.125(a)

#### FACILITIES, GENERAL.

Three Prairie Dogs were observed outside of their primary enclosure and in an unused fenced area within the park. The primary enclosure had originally housed five adult Prairie Dogs. The facility representative stated that a couple weeks prior to the inspection all of the animals escaped from their enclosure through buried mesh wire. Two of the Prairie Dogs were captured and placed in another enclosure to secure them while their primary enclosure was being repaired. The facility representative has made a plan for capture of these animals as well as for a future enclosure which would prevent the escape of these animals. For the three Prairie Dogs safety, they must be captured and contained within a safe and secure enclosure.

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

Correct by: August 31, 2015

An exit briefing was conducted with the named licensee and ACI Andrea D'Ambrosio and VMO Dr. Michael Neafsey at the time of the inspection.

#### Additional Inspectors

D Ambrosio Andrea, Animal Care Inspector
