Coral Springs, FL 33076

Customer ID: **502783**

Certificate: **58-C-1198**

Site: 002

Wildlife Wonderland Inc

Type: ROUTINE INSPECTION

Date: 08-MAY-2024

3.84(d)

Cleaning, sanitization, housekeeping, and pest control.

The facility's current pest control program is ineffective. At the time of inspection, a large rat was observed in close proximity to the lemur enclosures. The facility representative stated that they are currently experiencing problems with rats and plan to implement addition pest control measures to eliminate the rodent population. Pests can transmit disease, contaminate food and surfaces, and can harm animals. The facility must establish and maintain an effective program for the control of insects, ectoparasites, and avian and mammalian pests. Correct by May 24,2024.

This inspection and exit interview were conducted with the licensee.
