THE CREATURE CONSERVANCY

Type: ROUTINE INSPECTION

Date: 20-OCT-2020

3.131(a)

Sanitation.

In two enclosures, housing one hedgehog each, the wheels have excessive fecal material on the inside.

One bat enclosure housing approximately 10 bats has excessive fecal material staining the walls and climbing racks. The build-up is worse behind the racks which is approximately 2ft x 8ft.

The outdoor goat enclosure, housing 4 goats, has two shelters. The entrance to one shelter has a significant fecal build-up in front. The goats cannot enter this shelter without having to step through feces. The second shelter has a significant build-up on the inside of the shelter.

Fecal material shall be removed from the primary enclosure as often as necessary to prevent contamination of the animals, minimize disease hazards, and to reduce odors. Licensees must clean frequent enough to maintain an adequate level of husbandry to keep the animals healthy.

Correction date: November 6th, 2020

3.127(d)

Facilities, outdoor.

There is no perimeter fence surrounding the primary enclosure for two dingoes. A perimeter fence is required for all outdoor housing facilities that must be of sufficient height, 6' minimum, to keep animals and unauthorized person out, and

to be used as secondary containment in the case of escape from the primary enclosure.

The licensee must finish construction on the current perimeter fence or request approval for a variance from the Administrator.

Correction date: November 17th, 2020

This inspection and exit interview were conducted with facility representatives.
