Site: 001
DONALD SCHRAGE

Type: ROUTINE INSPECTION
Date: 25-FEB-2015

3.9(b) DIRECT REPEAT

FEEDING.

***Direct - Inside of the main food holding compartment and some of the trough areas of the self-feeders in 8 enclosures, affecting 16 dogs, there is a significant to an excessive amount of rodent feces (fresh to dried appearance) mixed throughout the food being offered to the dogs. Rodent feces and rodents could contaminate the feed and increase the risk of disease to the dogs.

The licensee must remove the rodent droppings from the self-feeders, clean and sanitize the feeders. The licensee must ensure that all food receptacles are readily accessible to the dogs, and located in such a way as to minimize contamination by excreta and pests.

This is a focused inspection to specifically address the direct non-compliant items (2.40 b. 2. - Veterinary Care issues and 3.9 b. Contaminated feed) identified during the inspection conducted on 9 Feb 15.

The following dog's identified under 2.40 b. 2.: a male Bichon Frise, microchip #081779872, a female Poodle, microchip #0A02201570, two female Schnauzer's, tag #'s 087 and 121 have been addressed.

Inspection an exit interview conducted with ACI Stephanie Osborne, ACI Angela DePoe, and the licensee.
