Inspection Report

The failure to observe the animals daily can lead to health problems that are not identified or treated in a timely manner. Untreated health problems can affect the health and well-being of the animals.

The licensee must observe each animal on a daily basis. If changes in animal health are noticed, these changes should be documented and must be treated by following the PVC. If the PVC does not describe the treatment for the specific condition, the veterinarian needs to be consulted so that the health conditions can be diagnosed and a treatment plan started if necessary.

Records of sick or injured animals should be kept and must be available to Aphis officials at the time of the inspection.

Correct by: remains uncorrected

Inspection and exit briefing conducted with licensee.
