AUSTIN, TX 78713

Customer ID: **1453**

Certificate: **74-R-0029**

Site: 001

The University of Texas at Austin -
ARC

Type: ROUTINE INSPECTION

Date: 20-APR-2022

2.33(b)(3) Critical

Attending veterinarian and adequate veterinary care.

A Principal Investigator failed to communicate with the attending veterinarian in a timely manner as previously instructed by IACUC regarding potential complications encountered during surgical procedures and the post-operative condition of rhesus macaques. Following one such surgery, an adult male rhesus macaque (A11N156) subsequently died, although the cause of death remains inconclusive. Direct and frequent communication is required so that timely and accurate information on problems of animal health is conveyed to the attending veterinarian. After full committee review of this incident and other recent records, the IACUC has formally instructed the PI that all procedures requiring anesthesia and or sedation may only be performed by the ARC veterinary staff until a qualified anesthesiologist approved by the IACUC is appointed. The PI must also communicate by phone with the veterinary staff before leaving for the day when anesthesia procedures have been performed to ensure proper anesthesia recovery has occurred.

Corrected at time of inspection

This inspection and exit interview were conducted with facility representatives.
