Folsom, CA 95630

Customer ID: **6014241**

Certificate: **93-C-1182**

Site: 001

SeaQuest Folsom LLC

Type: ROUTINE INSPECTION

Date: 05-NOV-2024

---

### 3.131(c)

#### Sanitation.

The refrigerators in both the storage room and the kitchen are in need of cleaning. The door of the unit in the kitchen has food debris and a film over the handles that cannot be avoided in order to open the unit. Inside the unit, the two recirculation fans on the ceiling have an accumulation of dust on the plastic grate that covers the fan blades. The refrigeration unit in the storage room that contains meat, fish and other items for carnivorous species, has a red/brown buildup on the door where it is opened. The unwashed surfaces and dusty fans need to be cleaned to prevent potential contamination of animal diets being both stored and prepared with the food items within. Contamination of feed could potentially affect the health and wellbeing of the animals.

Corrected on the day of inspection

### 3.131(d)

#### Repeat

#### Sanitation.

There were clusters of flies noted in enclosures throughout the facility and most notably within the kitchen food preparation area. Flies were noted circling and landing upon the food prep table, cutting board, knives, and adjacent walls. The Facility does have an insect control program, but at this time it is not effective enough to control the numerous flies within the facility. A safe and effective program for the control of insects and other pests shall be established and maintained.

Correct by November 19, 2024

This inspection and exit interview were conducted with facility representatives.
