### 3.106(b)(3)

#### WATER QUALITY.

The reagent for the free chlorine test has not been obtained, so the free chlorine concentrations for the manatee pools have not been performed for the past year. There were also several days within the past year where the total chlorine concentrations for the pools were not recorded. Additionally, some of the total chlorine concentrations that were reviewed were being recorded inaccurately.

Water samples shall be taken & tested daily for any additives (chlorine). All test results shall be recorded accurately.

Correct by May 20, 2015

The exit interview was conducted with the Director of the Manatee Conservation Center.
