Type: ROUTINE INSPECTION
Date: 07-MAY-2025

3.125(a)

Facilities, general.

The wire mesh fence in one of the pig enclosures had a hole (measuring approximately 6 inches x 6 inches). The damaged mesh had sharp points facing inside the enclosure. Damaged metal mesh can be a safety concern for the animals within the enclosure. Outdoor housing facilities must be structurally sound and maintained in good repair to protect the animals from injury and to contain the animals. Correct by 5/14/2025.

This inspection and exit interview were conducted with a facility representative.
