### 2.131(c)(1)

#### HANDLING OF ANIMALS.

On 4-22-15, a reporter from the local news interviewed the licensee for a story. During the interview the owner and the reporter were standing next to an enclosure with a juvenile lion and tiger. The reporter squatted next to the cage and petted the lion who was rubbing against the cage wires. In the news report, the tiger could be seen pawing at the owners feet under the gap at the bottom of the enclosure fence. During any public exhibition, animals must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the public so as to assure the safety of the animals and the public. Although the licensee did not give permission for the reporter to pet the cat, he did allow her to come into direct contact with two large cats by petting the lion and being within reach of the tiger. This action had potential for injury to her and possibly the cats. The public is to have no further contact with juvenile and adult cats. To be corrected from this day forward.

### 3.127(d)

#### FACILITIES, OUTDOOR.

Although this entire facility has a perimeter fence, it is not the required 8 feet high for dangerous exotics. The current chain link fence is 6 feet and has a 3 strand barb wire kick-out, giving a total of 7 feet. Two lions and 8 tigers are being rotated into two outdoor enclosures, which have four foot barriers around them. The perimeter fence needs to be raised to 8 feet high or separate perimeter fences - 3 feet away from the enclosure fences - can be placed around the outdoor enclosures. This is required to prevent unwanted entry of people or animals and as a secondary method of containment for the animals. To be corrected by 5-26-15.

Exit briefing conducted with licensee.
